Special Offers by Marlin

This was done at the factory beginning in 1962 with the image carved into the stock. A few years later they transitioned to the "cookie" with the pressed image. It was not offered through the factory catalogs but was advertised by Marlin in feature ads in various shooting publications. The cost was \$19.95 per stock. There were nine design choices featuring a longhorn steer superimposed on a map of Texas, squirrel, mountain lion, rabbit with hound, moose, deer, grouse, duck and bear with dogs. The special carving offer was short lived to at least 1970 and examples of the early carved type are considered scarce. A total of 4,264 Marlin's were produced with this special carving.

There was also a special run of the 336 which had a different deer head carved into the stock and was made for the Spiegel Company, along with rabbit on the Cotter & Company (Westpoint) model 45 from 1968 to 1970 (9,877 total).

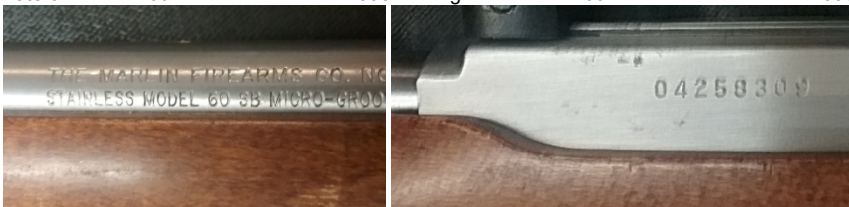

Notes

Some variations happened years before the changes were made in the catalogs, I have several rifles that the date of manufacture is before the catalog variation changes. Recant example is the 60SN in 2016 they changed the sling mounts to be molded into the stock, but in the 2019 catalog they are still shown as studs.

I have found several rifle models that were not listed in the catalogs.

Note 01 Model 60SB was first in their 1998 catalog but I found a 60SB with a date code of 1996.

Note 02 Marlin model 60 was first listed in catalogs in 1983 but have one with a date code of 1982.

Note 03 Marlin model 49 was first listed in catalogs in 1968 but have seen one with a date code of AC(1967)
